Canon iR3200 series

Versatile multifunctional printer for the office

"These devices are easy to use, safeguard your precious information and give you control over your costs."

Gary - Océ system consultant

A Canon document-production system gives you the power to perform. Delivering business-critical information where, when and how you want it. But combine that power with extensive Océ knowledge and expertise and stand back. Because now you've gained the people to succeed. People who take the time to know your needs. Who add real personality to your printers. Who can help you build a comprehensive knowledge-management infrastructure. Because they know which document systems will support your larger business success.

Océ and Canon

In 2010, Océ joined the Canon family to create the global leader in the printing industry. This compelling combination combines a 130-year heritage of Océ customer-driven innovation with the vast technical and financial resources of Canon. The result? Unmatched scale in research and development, manufacturing and distribution, together with accelerated development of new innovations and the industry's broadest choice of hardware, software and workflow solutions.

Balance cost effectiveness and high performance document production.

No need any more to choose between excellent monochrome document production and cost effectiveness. Thanks to the iR3200 series, which brings robust, efficient and secure printing, copying, scanning (colour and black & white) and faxing (optional) to your busy office or workgroup. Available at speeds of 25, 35 and 45 ppm.

Total control protects your information, fleet and bottom line

The iR3200 series gives you total control of your document system, costs and information. uniFLOW software (optional), provides detailed insight into who's printing what, when, where and at what cost to you, plus the ability to reroute documents to the most cost-efficient device in your network. Paperless options like scan-to-email, scan-to-iFax, scan-to-pc and default duplex save costs and waste. And controlled device access, secure user-assigned mailboxes and document encryption keep your information safe.

Quality and flexibility support your business effectiveness

Effectively support your professional image with the sophisticated finishing and 1200 dpi print quality found on the iR3200 series. You can also scan documents in colour, then use Canon i-Send to encrypt and dispatch them securely as PDFs to network folders, email addresses, mail, etc. With up to a 4950-sheet paper capacity, the system also lets you effectively keep up with your most-demanding document runs. Leaving more time for core business tasks.

Canon iR3200 series

Versatile multifunctional printer for the office

Seamless workflow integration simplifies production

An iR3200 system is designed for easy network integration, so installing it on your network is a simple task. With MEAP software that integrates Canon and third-party solutions, a universal print driver that runs any Canon device in your fleet, and iW Management Console and optional uniFLOW software that give you high-level control of your total document workflow.

Convenience encourages user acceptance

The iR3200 series features convenience at every turn. No wonder users love it. With:

- Easy professional finishing options
- 7.5-inch colour LCD touch screen
- Intuitive and secure mailbox functionality
- Paper capacity of 4950 sheets for uninterrupted, unattended printing
- Powerful document distribution options

Sustainability promotes your company values

The iR3200 series has class-leading energy efficiency and other sustainability features that support your company values by reducing your carbon footprint. These include ultra fast system warm-up and a sleep mode that uses as little as 1.5 watts, plus on-demand fusing, default user boxes, N-up and booklet printing settings that reduce paper usage.

Options to support your office document workflow

The iR3200 series has the flexibility and scalability to meet your company's specific needs. With print speeds of 25, 35 or 45 ppm and advanced finishing options like hole punching, saddle stitching and stapling.

In addition, in each speed category, you have the option to choose an N-model. This configuration bundles additional printer page description languages (UFR II and PCL) support and an automatic document feeder. So you gain extra functionality at a value price.

Main hardware options:

- Automatic document feeder (standard on N-model)
- Paper input with two trays or a plain pedestal
- Paper deck
- Envelope feeder attachment
- Extra output tray
- Inner finisher
- Extra output tray for Inner finisher
- Staple finisher
- Booklet maker
- Punch unit
- Fax kit
- Card reader

1 Document feeder
100-sheet capacity document feeder supports scanning at up to 51 originals per minute in black & white or colour.

2 Operator panel
The large 7.5 inch touch screen is easy to use and provides full control over your print jobs.

3 Professional finishing
For professional-looking documents that really stand out, choose the booklet maker. It allows you to automatically create 60 page A4 and A5 booklets (using 15 sheets) with just a few simple mouse clicks, from the comfort of your desk.

4 Hole punching
Provide a perfectly aligned 2 or 4-hole punch finish to documents, by configuring your staple finisher or booklet maker with a puncher unit.

5 MEAP
The device also incorporates Canon's MEAP (Multifunctional Embedded Application Platform), which enables new and customised applications to be incorporated into the device, whenever desired.

6 Extensive paper supply
The two standard paper trays provide 550-sheet capacity each. The 50-sheet bypass tray is standard as well. Maximum input capacity is 4,950 sheets.

Beyond the Ordinary

**Printing for
Professionals**

Professionals everywhere look to Océ for digital printing and document management. In the office, Océ systems keep the information of business and government moving. In manufacturing, architecture, engineering and construction, Océ wide format printers set the standard while our display graphics systems help people produce banners, billboards and other large, colourful applications. In corporate printrooms, marketing service bureaus and the graphic arts industry, Océ systems print transaction documents, mailings, newspapers, manuals and books on demand at the highest speeds. And Océ Business Services manage the complete document workflow of customers around the world. It all helps you go "Beyond the Ordinary" in printing and document management.
