## Canon imageRUNNER ADVANCE 6000 series

Intelligent multifunctional monochrome printer for the office

*"Whether in education, legal or government, my customers praise the Canon imageRUNNER ADVANCE 6000 series for its high productivity and cost efficiency".*

Nick, Océ account manager

A Canon document-production system gives you the power to perform. Delivering business-critical information where, when and how you want it. But combine that power with extensive Océ knowledge and expertise and stand back. Because now you've gained the people to succeed. People who take the time to know your needs. Who add real personality to your printers. Who can help you build a comprehensive knowledge-management infrastructure. Because they know which document systems will support your larger business success.

### **Océ and Canon**

In 2010, Océ joined the Canon family to create the global leader in the printing industry. This compelling combination combines a 130-year heritage of Océ customer-driven innovation with the vast technical and financial resources of Canon. The result? Unmatched scale in research and development, manufacturing and distribution, together with accelerated development of new innovations and the industry's broadest choice of hardware, software and workflow solutions.

## Produce all your office documents on one system

The Canon imageRUNNER ADVANCE 6000 series brings multifunctional production power to your office or workgroup. With black & white printing, copying and faxing, full-colour scanning and extensive, advanced finishing options. It's an intelligent, secure solution featuring seamless IT and workflow integration, plus numerous cost- and time-saving attributes. Available at speeds of 55, 65 or 75 ppm.

### Control your fleet, costs and information

Flexible scalability on the Canon imageRUNNER ADVANCE 6000 series means you won't waste money on functionality that doesn't fit your business. Save more with software like optional Canon uniFLOW software, which monitors and controls printing costs. Plus default duplexing to reduce paper use. A remote user interface lets users configure and administer printing remotely. While iW Management Console gives advanced control over your entire fleet.

Protect information, too, with secure printing, data encryption, digital signatures, and document scan lock and tracking. uniFLOW facilitates centrally controlled user authentication and follow-me printing. And with the optional hard disk encryption and mirroring kit the system is compliant with Common Criteria at EAL<sub>3</sub> level.

### Effectively support your business needs

With up to a 7700-sheet paper capacity, on-the-fly toner replenishment, and an optional Fiery®-based imagePASS server, the series lets you effectively keep up with your longest, most demanding document runs.

Gain even more time for core business tasks with:

- Colour and black & white scanning at up to 200 ipm
- High reliability that increases uptime
- LAN wireless printing
- Web Access software and Advanced Space that let you easily generate, share and store documents across your enterprise

# Canon imageRUNNER ADVANCE 6000 series

## Intelligent multifunctional monochrome printer for the office

### Seamlessly integrate your document workflow

No matter how you're currently working, the Canon imageRUNNER ADVANCE 6000 series fits right in. With MEAP software that integrates Canon and third-party solutions, a universal print driver that runs any Canon device in your fleet, and a platform and controller that are consistent with colour imageRUNNER ADVANCE models.

The system is also compatible with a wide range of network IT and printing environments. And features optional integrated software that provides sophisticated end-to-end workflow solutions.

Canon's uniFLOW software platform allows you to build automated workflows for both printing and scanning. You can also automatically route large jobs to the central reprographics department, scan to existing document management or archiving systems and manage users via integration with your existing user directory. These are just a few ways in which uniFLOW integrates your workflow and fleet infrastructure - across a single office or multiple locations.

### Make document tasks more convenient

The Canon imageRUNNER ADVANCE 6000 series builds convenience into all its functionality. Intuitive user interfaces of up to 10.4", personal or shared "one-touch" buttons for common tasks, easy document sharing and access via Advanced Space, and Universal Send for simultaneously sending to multiple destination, are just a few of the system's employee-pleasing conveniences.

Users will also enjoy print-from and scan-to USB, and document-preview thumbnails that make document selection fast and easy.

### Live your corporate values with sustainable production

The Canon imageRUNNER ADVANCE 6000 series promotes environmental sustainability at every turn. With class-leading energy efficiency: TEC ratings of 5.3 kWh (55 ppm), 6.1 kWh (65 ppm) and 6.7 kWh (75 ppm), sleep mode consumption of as little as 1.5 W, recycled- and bio-plastics technologies, and lower CO<sub>2</sub> emissions.

Default user box, duplex, N-up and booklet printing settings ensure less paper usage. While fast recovery encourages employees to use the system's sleep mode.

## Options to support your office document workflow

The Canon imageRUNNER ADVANCE 6000 series has the flexibility and scalability to meet your company's specific needs. With print speeds of 55, 65 or 75 ppm, advanced finishing options like online saddle stitching, letter folding and Z-folding, sheet and cover insertion, hole punching and sorting, and options like extra paper capacity and the Fiery®-based imagePASS controller. In addition, in each speed category, you have the option to choose an i-model. This configuration bundles additional Page Description Language (PDL) support. So you gain extra functionality at a value price.

### Main hardware options:

- One-pass document feeder
- High capacity tray (A4)
- High capacity tray (maximum A3)
- Tab feeding kit
- Copy tray
- Shift tray
- Staple finisher
- Booklet maker
- Punch unit (2 holes or 2/4 holes)
- Post inserter
- Post inserter and folding unit
- Fax kit
- Multimedia reader and writer
- Card reader
- Upright control panel
- Additional hard disk (80 GB or 250 GB)
- Removable hard disk
- imagePASS controller

- 1 Document feeder**  
The optional 300-sheet capacity one-pass document feeder supports colour and black & white scanning at up to 200 images per minute.
- 2 Workflow integration**  
Intelligent file sharing and document reproduction, respecting the existing document workflow, taking into consideration current and future security requirements.

- 3 Operator panel**  
The large intuitive colour touchscreen is easy to use and provides full control over your print job at the tip of your finger.
- 4 Controller**  
Standard 1.2 GHz controller with 2.5 GB RAM and 80 GB hard disk. Optional external Fiery®-based imagePASS controller for integration into professional workflows.

- 5 Paper input**  
The standard paper trays and bypass tray provide 4200-sheet capacity. The maximum paper input capacity is 7700 sheets.
- 6 Flexible finishing**  
Choice of finishing: shift tray, 4000-sheet staple or booklet finishing with punching, folding and multi-position stapling.

# Beyond the Ordinary

**Printing for  
Professionals**

Professionals everywhere look to Océ for digital printing and document management. In the office, Océ systems keep the information of business and government moving. In manufacturing, architecture, engineering and construction, Océ wide format printers set the standard while our display graphics systems help people produce banners, billboards and other large, colourful applications. In corporate printrooms, marketing service bureaus and the graphic arts industry, Océ systems print transaction documents, mailings, newspapers, manuals and books on demand at the highest speeds. And Océ Business Services manage the complete document workflow of customers around the world. It all helps you go "Beyond the Ordinary" in printing and document management.
